

HYBRID STAINLESS STEEL/
THERMOPLASTIC HINGES

STA-TITE® COMMERCIAL
FASTENING SYSTEM™

4 INTEGRATED BUFFERS

DESCRIPTION :

The Kensey is a heavy weight ring-only thermoplastic seat designed for universal-sized pans in commercial applications. The Kensey has special Hybrid Hinges™ that combine the benefits of both stainless steel and thermoplastic to provide a better hinge. The STA-TITE® Commercial Fastening System™ provides unmatched seat stability using an installation process where the lower nut "shears off" when the correct installation torque is achieved.

MATERIAL :

Thermoplastic

- Virtually unbreakable
- 100% Recyclable

HINGES :

Hybrid Hinges™: Stainless Steel & Thermoplastic

- Commercial-grade stainless steel bolt encased in a solid thermoplastic hinge base
- Thermoplastic hinge base resists corrosive effects of commercial toilet cleaners and other fluids
- Smooth, sleek design for easy cleaning

HARDWARE KIT :

STA-TITE® Commercial Fastening System™

- During installation, the Lower Nut will shear from the Upper Nut when the optimal torque is applied
- The seat will not loosen with use - No "callbacks" are required to re-tighten seats after installation, ever!
- No damage to ceramic from over tightening - nuts shear at the correct torque
- Upper Nut can be removed easily with a wrench when a replacement seat is needed

BUFFERS :

4 Integrated Buffers

- Buffers are moulded into the seat - Will not fall out, cannot be removed and will not deteriorate from the use of chemical pan cleaners over time

SPECIAL USE APPLICATIONS :

Iron Blue (RAL 5011)

- Bright colour contrast follows various guidelines regarding environments where users require visual assistance / reassurance

PACKAGING & WEIGHTS :

Individual:

- Seat weight: 1.20 KG
- Material: Corrugate Carton
- Carton Weight: 1.36 KG

Master:

- 6 units per Master
- Weight: 8.7 KG

Pallets:

- Euro Pallet Quantities (80 x 120): 144
- Standard Pallet Quantities (100 x 120): 216

SPECIFICATIONS :

- Style: Closed front, no cover
- Size/Shape: Universal
- Material: Thermoplastic
- Hinges: Hybrid Stainless Steel/Thermoplastic
- Hardware Kit: Patent-Pending STA-TITE® Commercial Fastening System™
- Buffers: 4 moulded into the ring
- Suggested Uses: Commercial

COLOURS / SKU NUMBERS :

- White - 108061000
- Iron Blue - 108061104
