TANK

A simple curved edge tank has an easy to read display and digital temperature change button. With the new easy install electric cable, combined with the tank size being 25% smaller than most others. It has a 2.4ltr capacity delivering 1.7 ltr of boiling water. It makes installation simple and easy normally less than 1 hour.

FILTER

The key benefit of having installed the Springflow WF100 filter is that not only will this protect your tank and give pure boiling water but also from this well known supplier the filters are always readily available.

EVOLUTION

Kitchens are constantly developing and evolving and the kitchen sink in recent years, has been at the heart of this evolution. Boiling water taps are now becoming an essential appliance in any new kitchen, for the practical simple ease, convenience and time saving practicality they offer.

The modern boiling water taps operate at a maximum 98°C temperature to avoid dangerous steam and time delay in use. With the addition of push button sprung handles the latest taps offer a high degree of safety features with all the benefits of boiling hot water readily available.

STYLE AND CHOICE

Modern living is all about great design and when selecting a boiling water tap to match your beautiful kitchen you not only want elegant looks but also the highest quality standards.

Our 350 series range is built around offering you great style and choice and under pinning manufacturing excellence to ensure years of practical use.

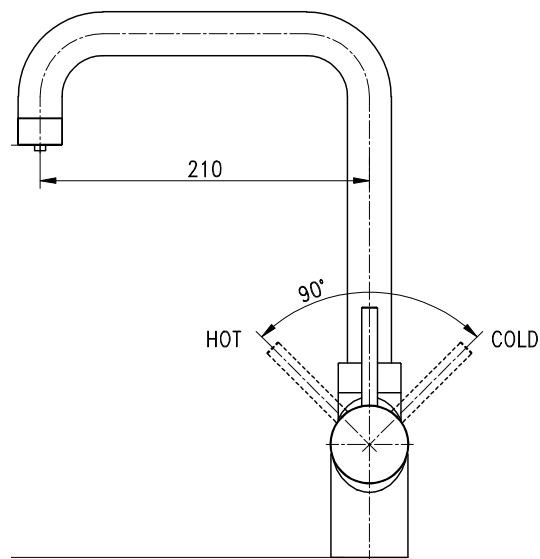

Boiling Water Taps

TANK

A simple curved edge tank has an easy to read display and digital temperature change button. With the new easy install electric cable, combined with the tank size being 25% smaller than most others.

It has a 2.4ltr capacity delivering 1.7 ltr of boiling water. It makes installation simple and easy normally less than 1 hour.

FILTER

The key benefit of having installed the Springflow WF100 filter is that not only will this protect your tank and give pure boiling water but also from this well known supplier the filters are always readily available.

BUILT IN QUALITY

The 360 series taps are manufactured from a solid brass body, which ensures all the taps have exceptional performance and long life expectancy.

With a choice of finishes including the popular highly polished chrome and brushed nickel they will give years of practical use whilst maintaining great looks.

DESIGN ELEGANCE

The quality and build characteristics of the products are clearly visible in a number of ways and is self evident in the beautiful design.

With the choice of two popular styles the classic swan neck curved shape or the more modern D shape tap we have the designs to complement any modern kitchen.

Boiling Water Taps

TANK

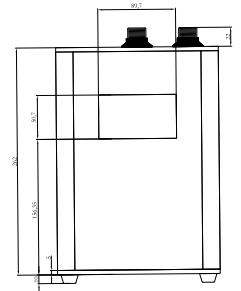

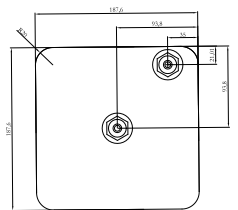

The latest boiling water tank has a number of improvements over previous models:

25% smaller in size than most other tanks but still holds 2.4 litres of water delivering 1.7 litres of boiling water, but uses far less cupboard space with simple installation. Easy to read display on the front of the tank which now includes filter monitoring

Detachable plug-in 13 amp standard electrical cable allowing flexibility in installation

TANK SPECIFICATION

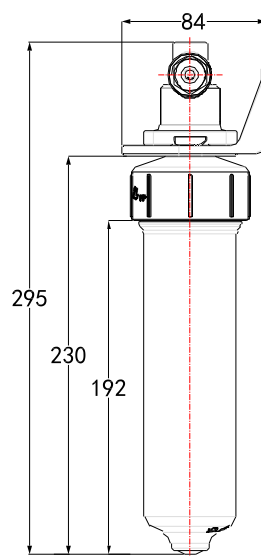

- Un-obstructed touch screen
- Interactive screen control
- Temperature range 75c to 98c
- Ease clean design – no sharp edges
- Detachable 13amp power cable
- Operating pressure 1.0 – 5.0 bar
- Material outer casing powder coated mild steel, with stainless steel inner tank.

FILTER HOUSING

In-line housing with 1/4 push fit connectors
1/4 turn body housing cap and mount
Screw fit for easy replacement cartridge
Material - Long life plastic

FILTER

A neat simple filter sits inside your cupboard for easy access and simple filter change.

The filter element removes the limescale and heavy metal particles protecting your tank and providing pure filtered water, which allows cooked food to flood with flavour. Spare filters readily available: WF100

FILTER CARTRIDGE SPECIFICATION

- Nano phosphate filter
- Coats the calcium and stops it sticking to the tank element
- Removes chlorine and particles
- Filter improves water taste
- Estimated replacement cycle every six months
